

# Salt Stars

## Supplies:

- Liquid Glue
- Liquid Watercolors
- Salt
- Paintbrush (or Eye Dropper)
- Paper (Cardstock or Watercolor Paper would be best)

Step 1: Start by drawing a star on your paper. You can make it as intricate as you want.

Step 2: Next draw over the lines of your star with liquid glue.

Step 3: Now sprinkle a generous amount of salt on the liquid glue. The salt will only stick to where there is glue.

Step 4: It's time for the color! Slowly add color to your star by wetting the paintbrush with a generous amount of watercolor paint. Then gently touch the salt on the star. The paint will be absorbed by the salt, leaving you a colored star.

Step 5: Repeat step 5 for other colors/lines of your star.

Step 6: Leave your salt painting to dry.

If you are adventurous, draw the whole nativity scene with this same process! Or try the Magi following the star. The sky's the limit on how creative you can be!
